2. SITUATION ASSESSMENT/FORECAST

2.1 Thai Meteorological Department The weak high pressure area has covered upper Thailand and the southeasterly wind blows to the central and the eastern part. The weather remains cool in the North and the Northeast of Thailand with morning fog and isolated thick patches. The moderate northeast monsoon prevails across the South China Sea and the lower Gulf of Thailand causing scattered thundershowers during this period together with weaken wind waves of Gulf of Thailand. The cool weather will reach Thailand on Dec 1, 2011.

2.2 Royal Irrigation Department (RID):

- **Water situation in major basins:**

- **The Central Basins (Thachine and Chao Phraya basin):** Water level in the river at Nakhon Sawan and Chainat, Province are below river bank. But water level is still higher than the river bank in some districts of Suphanburi

(Song Phi Nong District). However, the water level in the basins is likely to decrease.

- **Chulalongkorn Watergate, Pathum Thani Province** the water level at Chao Phraya River side is decreasing at 1.36 m. below river bank and of Rangsit Prayulsak canal at 1.47 m. below river bank. They are likely to decrease.
- **The Southern Basins (Nakhon Si Thammarat, Pattani, and Lower East Basin):** All rivers are runoff.

2.3 Bangkok Metropolitan Administrative (BMA) On 29 November, the highest water level in Chao Phraya River at Pak Khlong Talad Station was 2.13 meters at 11.36 a.m. The following are overall canals water situation of BMA:

- **Western Side of BMA** the overflow from water breakthrough at Don Muang from Rang Sit decreased 5 c.m. and Lower Hok Wa Canal at Song Canal Watergate reduced around 5 c.m..
- **Eastern Side of BMA (Thonburi Area)**, the overflow still existed at Mahasawas Canal at Bhuttamonton Sai 2 Road, Bang Prom Canal at Kanchanapisek Road and Bhuttamonton Sai 3 Road, Bang Cheuk Nung at Bhuttamonton Sai 2 Road, Bang Wag at Bhuttamonton Sai 1 Road and Taweewatana Canal.

For more information, contact BMA's EOC at 0-2248-5115 or 24-hr hotline 1555 or visit BMA website at www.bangkok.go.th.

2.4 Hydrographic Department of the Royal Thai Navy: On 29 Nov 2011, high-low tide of the sea can be expected twice at 04.29 a.m. for the lowest at 0.81 m. and the highest at 11.36 a.m. at 2.13 m; and at 3.14 p.m. for the lowest at 1.60 m., and the highest at 07.38 p.m. at 1.72 m.

3. Warning / Advisory Messages

Department of Thai Meteorological issued Warning No. 17 on November 25, 2011 at 04.30 p.m. for "Heavy rain and strong wind-wave in Southern Thailand" : The rather strong northeast monsoon remains cover the south and the Gulf of Thailand causing scattered to Fairly widespread thundershower and isolated heavy rainfall in the south east-coast from Surat Thani southward. People in risky areas along foothills near waterways and in lowlands are warned of flash flood. These areas include Nakhon Si Thammarat, Phatthalung, Songkhla, Pattani, Yala, Narathiwat, Trang and Satun. The strong wind-waves in the lower Gulf of Thailand from Nakhon Si Thammarat southward are expected 2-3 meters high. All ships should proceed with caution and small boats stay ashore. People along southern east-coast are warned of high surfs in a couple days.

The high pressure area and the westerly trough remain over upper Thailand. Continuous cooler weather with temperature drops 2-4 degree and frost on high mountains of the North is expected during 26-28 Nov.

The advisory is in effect for Thailand from 25 November 2011.
