

Improving emergency response mechanism

Plan of Small Satellite Constellation for Environmental and Disaster Monitoring and Prediction

China plans to launch two small optical satellites and one small SAR satellite in 2007, called the "2+1" Project, and also China will launch another 4 optical satellites and 4 SAR satellites later.

Community-based Disaster Risk Reduction Campaign

Asian Conference on Disaster Reduction
27-29 September 2005 Beijing, China

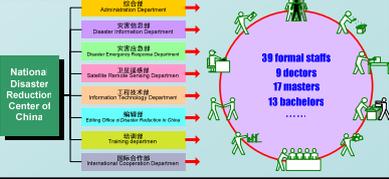

Study Course on Disaster Risk Management for Officials of the Tsunami Affected Countries
23-25 May Beijing, China

Currently, based on the Disaster Reduction Planning (1998-2010), the NCDR has set about outlining National Special Planning on Natural Disaster Reduction during the next five-year agenda following the emerging features of China's natural disasters and the latest development in disaster reduction. NCDR will propose the development strategy and highlight priorities during the 11th Five-Year Plan to facilitate the rapid development of disaster reduction in an all-round fashion.

民政部国家减灾中心
National Disaster Reduction Center of China

National Disaster Reduction Center of China

- The construction of ground application system of small satellite constellation on environment and disaster monitoring and forecasting
- Natural disaster risk management
- Disaster emergency response
- Material reserve planning
- Disaster reduction education and training

The organizational chart shows the following departments:

- 办公室 (Administration Department)
- 灾害调查部 (Disaster Investigation Department)
- 灾害应急管理部 (Disaster Emergency Management Department)
- 灾害预防部 (Disaster Prevention Department)
- 灾害风险评估部 (Disaster Risk Assessment Department)
