

COMMENTS BASED ON EXPERIENCES FROM TY HAIYAN (2013)

Asec Rodolfo Demosthenes Santillan

Last strong
typhoon
experience
was
November 26,
1912

Complacency
of the
residents to
evacuate

unfamiliarity
with storm
surge

Government
caught
unprepared
for the “new
normal”

prepositioned
logistics
washed out

Response
and Recovery
measures
unfit for the
situation

“Chaotic”
Local and
International
Humanitaria
n response

Erratic
Logistics
management

- Early Warning System(Project NOAH)
- Pre Disaster Risk Assessment (PDRA)

Evacuation Plan

Information and Advocacy Campaign (SMS, Bulletins)

- Sunset Review RA 10121
- Enhancement of the Prepared Plan
- Development of Contingency Plan
- Public - Private Partnership

Prepositioning of Logistics

- Enhancement of the Response Plan
- Incident Command System in placed

- Development Policy on International Humanitarian Response
- Policy Guidelines on the Interoperability of Incident Management Teams (IMS) and the Response Clusters

Logistics Management
