## Main Objectives:

- To showcase good and innovative practices on the linkage of daily activity or welfare/social protection in normal times with DRR efforts in emergencies
- To share good and innovative practices on improving DRR literacy of those who are left behind
- To discuss how we can effectively link daily activity or welfare/social protection in normal times with DRR efforts in emergencies in a sustainable manner especially at the local level
- To identify effective actions of enhancing DRR literacy of people most at risk
- To communicate the importance of government intervention, backed by policy and budgets, for sustainable action and pre-investment.

## Key Messages:

- Enhancing DRR Literacy is one of the important keys for enhancing community resilience.
- Experienced-based /practical experience-oriented activities/ education is useful for improving DRR Literacy.
- DRR activities need to link with people's daily activity or welfare/social protection system to continuously benefit everyone in the community.
- Collaboration among all the stakeholders in the communities lead to effective proactive actions in emergencies with no one left behind.
- For ensuring sustainability, community DRR activities should be backed up by policy measures including pre-investment for DRR.
