## Natural Disaster Data Book 2014 An Analytical Overview

Asian Disaster Reduction Center

## Overview

The Asian Disaster Reduction Center (ADRC) Natural Disasters Data Book 2014 provides statistical perspectives in figures and tables for 2014 as well as for the period 1985-2014 based on data obtained by EM-DAT.

According to EM-DAT, 328 natural disasters occurred in 2014 worldwide, killing 18,740 people and affecting over 107.3 million people. The estimated amount of economic damage came close to US\$97.6 billion.

In 2014, the earthquake that hit China in August brought about serious damages to the country. The disaster killed 731 people and affected over 1.1 million people. The death toll is the largest in Asia and the fourth in the world following three epidemic events in Africa.

Drought and flood in China have largest affected people in the world with over 27.5 million and 15.0 million people, respectively.

By region, Asia is ranked the highest in disaster occurrences, the number of affected people and economic damage with 43.6 percent in occurrences; number of affected people, 86.2 percent; and amount of economic damage, 65.8 percent. Africa has the largest share in number of killed people with 60.7 percent.

By disaster types, flood is dominant in occurrence and economic damage at 39.3 percent and 34.1 percent, respectively, while epidemics tops in number of people killed by 58.2 percent and so does drought in number of affected people with 37.0 percent.

Data Book 2014 also contains tables of the 25 worst disasters by number of people killed and total affected people, economic damage, and their respective ratios to population and gross domestic product. It also includes tables of 2014 disasters in Asian countries sorted by country and disaster type.

## [Notes]

## Source:

All disaster data are based on D. Guha-Sapir, R. Below, Ph. Hoyois - EM-DAT: International Disaster Database - www.emdat.be - Université Catholique de Louvain - Brussels - Belgium. Data set was obtained on 12 June 2015, unless otherwise stated.

## EM-DAT Criteria:

For a disaster to be entered into the database, at least one of the following criteria must be fulfilled:
-Ten (10) or more people reported killed
-Hundred (100) or more people reported affected

- Declaration of a state of emergency
-Call for international assistance.
In this Data Book 2014 "killed people" are defined as persons confirmed as dead and persons missing and presumed dead. "Affected people" are the sum of injured, homeless, and affected in EM-DAT. EM-DAT defines affected people as people requiring immediate assistance during the period of emergency; it can also include displaced or evacuated people.

## Disaster Terms:

"Animal accident" is that human encounters with dangerous or exotic animals in both urban and rural developments.
"Drought" includes an extended period of unusually low precipitation that produces a shortage of water for people, animals and plants.
"Earthquake" includes ground shaking and tsunami.
"Epidemic" includes bacterial and viral infectious diseases.
"Extreme Temperature" includes heat wave, cold wave, and extreme winter conditions.
"Flood" includes general flood, and flash flood.
"Landslide" includes avalanche, debris, and rockfall.
"Storm" includes local storm, tropical cyclone, and winter storm.
"Volcanic activity" means volcanic eruption.
"Wildfire" includes bush/brush fire, forest fire, and scrub/grassland fire.

## Disclaimer:

Country and region classification used in this book is based on EM-DAT criteria.

## 1. IMPACTS OF NATURAL DISASTERS BY REGION, 2014

This section shows the impacts of natural disasters in four indices, occurrence, number of deaths, number of affected people and economic damage that were reported across the world in 2014. As shown in Figure 1, Asia ranks the first among all regions in the categories of disaster occurrence, the number of affected people and economic damage, accounting for 43.6 percent, 86.2 percent and 65.8 percent respectively. On the other hand, Africa is ranked the highest in the number of killed people, which is largely attributed to epidemics in Africa.

Figure 1: Impacts of Natural Disasters by Region, 2014

Table 1: Impacts of Natural Disasters by Region, 2014

| Region | Impact |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Occurrence <br> (share in \%) |  | Killed (share in \%) |  | Affected (share in \%) |  | Damage (US\$ million) (share in \%) |  |
| Africa | 49 | (14.9\%) | 11,376 | (60.7\%) | 6,817,848 | (6.4\%) | 640 | (0.7\%) |
| Americas | 77 | (23.5\%) | 1,095 | (5.8\%) | 4,968,997 | (4.6\%) | 25,159 | (25.8\%) |
| Asia | 143 | (43.6\%) | 5,861 | (31.3\%) | 92,520,523 | (86.2\%) | 64,265 | (65.8\%) |
| Europe |  |  | 207 | (1.1\%) | 2,864,313 | (2.7\%) | 6,473 | (6.6\%) |

| Total | 328 | (100.0\%) | 18,740 | (100.0\%) | 107,341,714 | (100.0\%) | 97,616 | (100.0\%) |

[^0]
## 2. IMPACTS OF NATURAL DISASTERS BY DISASTER TYPE, 2014

Regarding the breakdown of impacts of disasters by disaster type, 2014 sees different patterns of impacts by each index. In occurrence, flood tops at 39.3 percent followed by storm 29.6 percent though in number of killed and affected people, epidemic and drought have the largest shares, 58.2 percent and 37.0 percent, respectively. However, storm brings the heaviest economic damage by 40.9 percent followed by flood, 37.2 percent.

Figure 2: Impacts of Natural Disasters by Disaster Type, 2014

Table 2: Impacts of Natural Disasters by Disaster Type, 2014

| Disaster Type | Impact |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Occurrence <br> (share in \%) |  | Killed (share in \%) |  | Affected (share in \%) |  | Damage (US\$ million) (share in \%) |  |
| Animal accident | 1 | (0.3\%) | 12 | (0.1\%) | 5 | (0.0\%) |  | (0.0\%) |
| Drought | 15 | (4.6\%) |  | (0.0\%) | 39,724,280 | (37.0\%) | 11,005 | (11.3\%) |
| Earthquake | 27 | (8.2\%) | 778 | (4.2\%) | 3,695,051 | (3.4\%) | 7,274 | (7.5\%) |
| Epidemic | 20 | (6.1\%) | 10,909 | (58.2\%) | 157,199 | (0.1\%) |  | (0.0\%) |
| Extreme temperature | 15 | (4.6\%) | 1,049 | (5.6\%) | 1,101,441 | (1.0\%) | 2,518 | (2.6\%) |
| Flood | 129 | (39.3\%) | 3,344 | (17.8\%) | 36,556,893 | (34.1\%) | 36,338 | (37.2\%) |

## 3. IMPACTS OF NATURAL DISASTERS IN ASIA BY DISASTER TYPE, 2014

Regarding the overview of impacts of disasters by disaster type in Asia, flood tops in all indices. Storm is ranked the second in occurrence and economic damage at around 36-39 percent. Landslide and drought have the second largest shares in number of killed and affected, respectively.

Figure 3: Impacts of Natural Disasters by Disaster Type in Asia, 2014

Table 3: Impacts of Natural Disasters by Disaster Type in Asia, 2014

| Disaster Type | Impact |  |  |  |  |  |  |  |

## 4. TRENDS OF WORLD NATURAL DISASTERS, 1985-2014

## 4-1 NUMBER OF DISASTERS IN THE WORLD (1985-2014)

In terms of number of disasters, the year 2014 sees a slight decline from the previous year's 361 to 328 . In the long run, the upward trend continues from the late 1980s till 2000 and the downward trend follows. In the collective 5year period representation of data in Figure 4-2, a downward trend is observed in the last 15 years starting from 2000-2004 period.

Figure 4-1: Disaster Occurrence, 1985-2014

Figure 4-2: Disaster Occurrence (Average of 5-year period), 1985-2014

[^3]
## 4-2 NUMBER OF PEOPLE KILLED IN THE WORLD (1985-2014)

The death toll in 2014 shows a decrease from the previous year's 23,538 to 18,740. As seen in Figure $4-4$ about the trend of the 5 -year period average, the number of people killed for the period 2010-2014 remains high at around 80,000 people in the last 15 years.

Figure 4-3: Number of People Killed, 1985-2014

Figure 4-4: Number of People Killed (Average of 5-year period), 1985-2014

[^4]
## 4-3 NUMBER OF PEOPLE AFFECTED IN THE WORLD (1985-2014)

In terms of number of the affected people, 2014 sees a slight increase from the previous year's $99,908,268$ people to $107,341,714$. The 5 -year period average representation shows that the number of affected people continues to decrease in the last 15 years.

Figure 4-5: Total Number of Affected People, 1985-2014

Figure 4-6: Number of Affected People (Average of 5 year period), 1985-2014

[^5]
## 4-4 ECONOMIC DAMAGE IN THE WORLD (1985-2014)

Economic damage caused by natural disasters declines from some US $\$ 119$ billion in 2013 to US\$ 97.6 billion in 2014, the lowest in the last five years. By contrast, in the 5 -year period average analysis, the 2010-2014 average reached a record high level in the last 30 years.

## 5. IMPACTS OF WORLD NATURAL DISASTERS BY REGION, 1985-2014

For the period 1985-2014, Asia dominates and ranks the first in all natural disaster's impact categories across regions of the world, especially in terms of the number of killed and affected.

Figure 5: Impacts of World Natural Disasters by Region, 1985-2014

Table 5: Impacts of Natural Disasters by Region, 1985-2014

| Region | Impact |  |  |  |  |  |  |  |

## 6. THE 25 WORST DISASTERS IN ASIA 2014

## 6-1 THE 25 WORST DISASTERS IN ASIA BY NUMBER OF PEOPLE KILLED, 2014

The death toll by the earthquake in China in August tops at 731 in Asia in 2014, followed by the landslide in Nepal at 450. There are 11 disaster events in Asia found in the list which claimed more than 100 lives. Flood occupies ten ranks in the worst 25 list.

Table 6-1: The 25 Worst Disasters in Asia by Number of People Killed, 2014

## 6-2 THE 25 WORST DISASTERS IN ASIA BY NUMBER OF PEOPLE KILLED PER MILLION POPULATION, 2014

Using the ratio of the number of people killed to total country population, the landslide in Nepal tops with 16 persons killed per one million. By disaster type, floods occupy the largest share in the 25 Worst Disasters in Asia by number of people killed per population in 2014 with ten disaster events listed in the list.

Table 6-2: The 25 Worst Disasters in Asia by Number of People Killed per Million Population, 2014

## 6-3 THE 25 WORST DISASTERS IN ASIA BY NUMBER OF PEOPLE AFFECTED, 2014

In terms of the number of people affected, the drought in China ranks the first with 27.5 million people affected. In 2014, the number of disaster events that affected more than one million amounts to 18 . By country, China has nine ranks in the list. By disaster type, flood amounts to 12 out of the 25 disasters followed by 8 storms .

Table 6-3: The 25 Worst Disasters in Asia by Total Number of People Affected, 2014

|  | Disaster Type | Country | Date | Killed | Affected | Economic Damage <br> (US\$ Million) |

## 6-4 THE 25 WORST DISASTERS IN ASIA BY AFFECTED PEOPLE PER THOUSAND POPULATION, 2014

Using the index of the affected people per thousand population, the drought in Malaysia results in 74 affected person per thousand population. Among top 25 countries, flood and storm disasters occupy 14 and 7 ranks in the list, respectively.

Table 6-4: The 25 Worst Disasters in Asia by Total Number of People Affected per Thousand Population, 2014

|  | Disaster Type | Country | Date | Affected per thousand | Affected | Population |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## 6-6 THE 25 WORST DISASTERS IN ASIA BY RATIO OF ECONOMIC DAMAGE TO GDP, 2014

In terms of economic damage incurred relative to gross domestic product (GDP), two disasters, the floods in Pakistan and India result in the highest damage with 0.861 percent and 0.853 percent of the individual GDP. Flood and storm have the highest ranks with 12 and 7 ranks, respectively. China shares nine ranks in the list.

Table 6-6: The 25 Worst Disasters in Asia by Ratio of Economic Damage to GDP, 2014

|  | Disaster Type | Country | Date | Economic Damage / GDP (as per cent) | Economic Damage (US\$ Million) | GDP <br> (US\$ Million) |

EM-DAT: The OFDA/CRED International Disaster Database - www.emdat.be,
Université Catholique de Louvain, Brussels (Belgium)

This table shows sum of disaster impacts in Asia in 2014.
In 2014, China accounts for the highest in all indices in Asia, occurrence, number of killed people, number of affected people and economic damage by 27 percent, 24 percent, 65 percent and 45 percent, respectively.

While India has the second largest shares after China by 10 percent, in number of killed people, Nepal and Pakistan follow China by 14 and 11 percent.

On the other hand, the Philippines has the second largest number of people affected by 14 percent after China.
Similar to disaster occurrence, India follows China in economic damage by 36 percent.

This table shows disasters in Asia in 2014 by disaster type.
Flood makes up for the largest shares in all indices of occurrence, the number of people killed, the number of people affected and economic damage, by 38 percent, 44 percent, 34 percent and 46 percent, respectively. A total of 19 countries have impacts by flood.

Then storm ranks second in occurrence, number of killed people and economic damage by 36 percent, 16 percent and 39 percent respectively with 13 countries.

In number of affected people, drought has second largest at 34 percent followed by storm by 27 percent.

The Asian Disaster Reduction Center was established in Kobe, Japan in 1998 with the mission to enhance disaster resilience of its member-countries, to build safe communities, and to create a society where sustainable development is possible. The Center works to build disaster resilient communities and to establish networks among countries through many programs including personnel exchanges in this field.
