

Natural Disaster Data Book 2017

An Analytical Overview

Overview

Asian Disaster Reduction Center (ADRC) Natural Disasters Data Book (Hereafter "Data Book" for short) 2017 provides statistical perspectives in figures and tables for 2017 as well as for the period 1988-2017 based on data obtained by EM-DAT.

According to EM-DAT, 366 natural disasters occurred in 2017 worldwide, killing 11,843 people and affecting over 959 million people. The estimated amount of economic damage came close to US\$337.5 billion.

In 2017, the landslide that hit Sierra Leone in August brought about serious damages to the country. The disaster claimed more than 1000 people. The flood that hit the India in August has the largest affected people in the world with over 17.2 million.

On the other hand, the storm that hit United State in August caused the largest economic damage worth US\$95.0 billion, which ranked the highest in the world.

By region, Asia is ranked the highest in the indices of disaster occurrences, the number of people killed and people affected. Asia accounts for 42.1 percent in occurrences; number of people killed, 50.8 percent; and the number of people, 69.6percent. As for amount of economic damage, Americas topped by 87.9 percent.

By disaster types, flood is tops in killed, and affected by 28.2 percent, and 57.9 percent, respectively, while storm tops in number of occurrences and amount of economic damage by 35.5 percent, and 84.6 percent respectively.

Data Book 2017 also contains tables of the 25 worst disasters by number of people killed and total affected people, economic damage, and their respective ratios to population and gross domestic product. It also includes tables of 2017 disasters in Asian countries sorted by country and disaster type.

[Notes]

Source:

All disaster data are based on D. Guha-Sapir, R. Below, Ph. Hoyois - EM-DAT: International Disaster Database – www.emdat.be – Université Catholique de Louvain – Brussels – Belgium. Data set was obtained on 5 March 2019, unless otherwise stated.

EM-DAT Criteria:

For a disaster to be entered into the database, at least one of the following criteria must be fulfilled:

- Ten (10) or more people reported killed
- Hundred (100) or more people reported affected
- Declaration of a state of emergency
- Call for international assistance.

In this Data Book 2017 "Total deaths" are defined as persons confirmed as dead and persons missing and presumed dead. "Total Affected" are the sum of injured, homeless, and affected in EM-DAT. EM-DAT defines affected people as people requiring immediate assistance during the period of emergency; it can also include displaced or evacuated people.

Disaster Terms:

"Animal accident" is that human encounters with dangerous or exotic animals in both urban and rural developments.

"Drought" includes an extended period of unusually low precipitation that produces a shortage of water for people, animals and plants.

"Earthquake" includes ground shaking and tsunami.

"Epidemic" includes bacterial and viral infectious diseases.

"Extreme Temperature" includes heat wave, cold wave, and extreme winter conditions.

"Flood" includes general flood, and flash flood.

"Landslide" includes avalanche, debris, and rockfall.

"Storm" includes local storm, tropical cyclone, and winter storm.

"Volcanic activity" includes volcanic eruption of lava, ash, hot vapour, gas, and pyroclastic material.

"Wildfire" includes bush/brush fire, forest fire, and scrub/grassland fire.

Disclaimer:

Country and region classification used in this databook is based on EM-DAT criteria.

1. IMPACTS OF NATURAL DISASTERS BY REGION

This section shows the impacts of natural disasters in four indices, occurrence, number of deaths, number of affected people and economic damage that were reported across the world in 2017. As shown in Figure 1, Asia ranks the first among all regions in the categories of disaster occurrence, the number of killed people, and affected people, accounting for 42.1 percent, 50.8 percent, and 69.6 percent, respectively. On the other hand, Americas is ranked the highest in the amount of economic damage, which is largely attributed to storm in Americas.

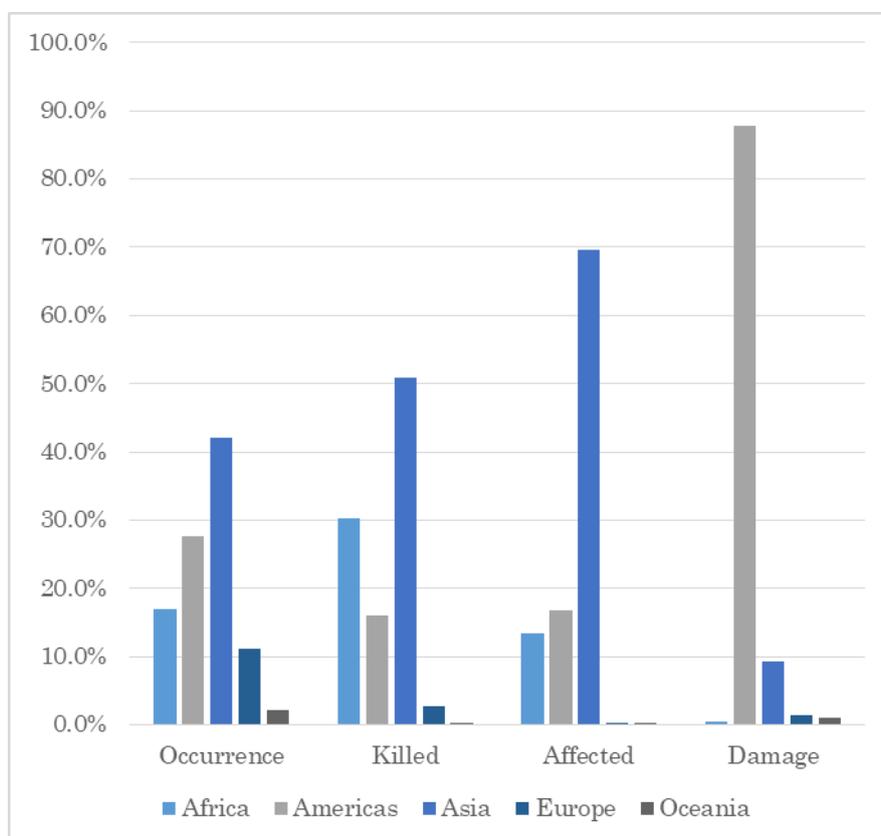

Figure 1: Impacts of Natural Disasters by Region, 2017

Table 1: Impacts of Natural Disasters by Region, 2017

Region	Impact							
	Occurrence (share in %)		Killed (share in %)		Affected (share in %)		Damage (US\$ million) (share in %)	
Africa	62	(16.9%)	3,588	(30.3%)	12,934,765	(13.5%)	1,291	(0.4%)
Americas	101	(27.6%)	1,893	(16.0%)	16,077,404	(16.8%)	296,608	(87.9%)

2. IMPACTS OF NATURAL DISASTERS BY DISASTER TYPE, 2017

Regarding the breakdown of impacts of disasters by disaster type, two disasters, flood and storm, are dominant in all categories. Flood tops at 28.2 percent and 57.9 percent while in the number of killed and affected people. The number of occurrence, storm has the largest shares, 35.5 percent followed by flood, 34.4 percent. Storm brings the heaviest economic damage by 84.6 percent followed by flood, 6.0 percent.

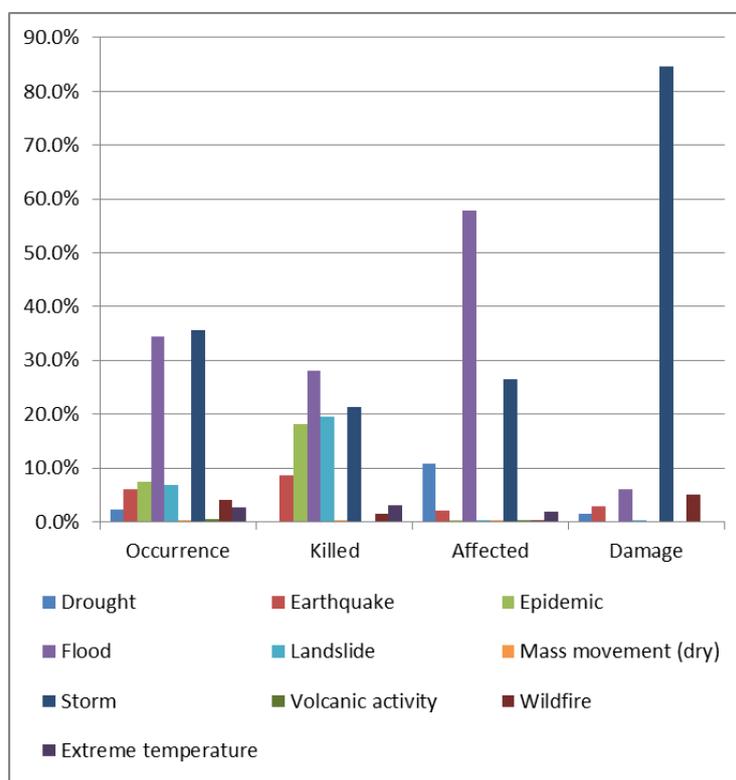

Figure 2: Impacts of Natural Disasters by Disaster Type, 2017

Table 2: Impacts of Natural Disasters by Disaster Type, 2017

Disaster Type	Impact			
	Occurrence (share in %)	Killed (share in %)	Affected (share in %)	Damage (US\$ million) (share in %)
Drought	8 (2.2%)	0 (0.0%)	10,331,874 (10.8%)	4,922 (1.5%)
Earthquake	22 (6.0%)	1,012 (8.5%)	2,006,792 (2.1%)	9,613 (2.8%)
Epidemic	27 (7.4%)	2,140 (18.1%)	359,031 (0.4%)	0 (0.0%)

3. IMPACTS OF NATURAL DISASTERS IN ASIA BY DISASTER TYPE, 2017

Regarding the overview of impacts of disasters sorted by disaster type in Asia, Figure 3 shows a similar pattern to Figure 2. However, in number of the affected people, flood has the largest shares, 77.2 percent followed by storm, 18.1 percent.

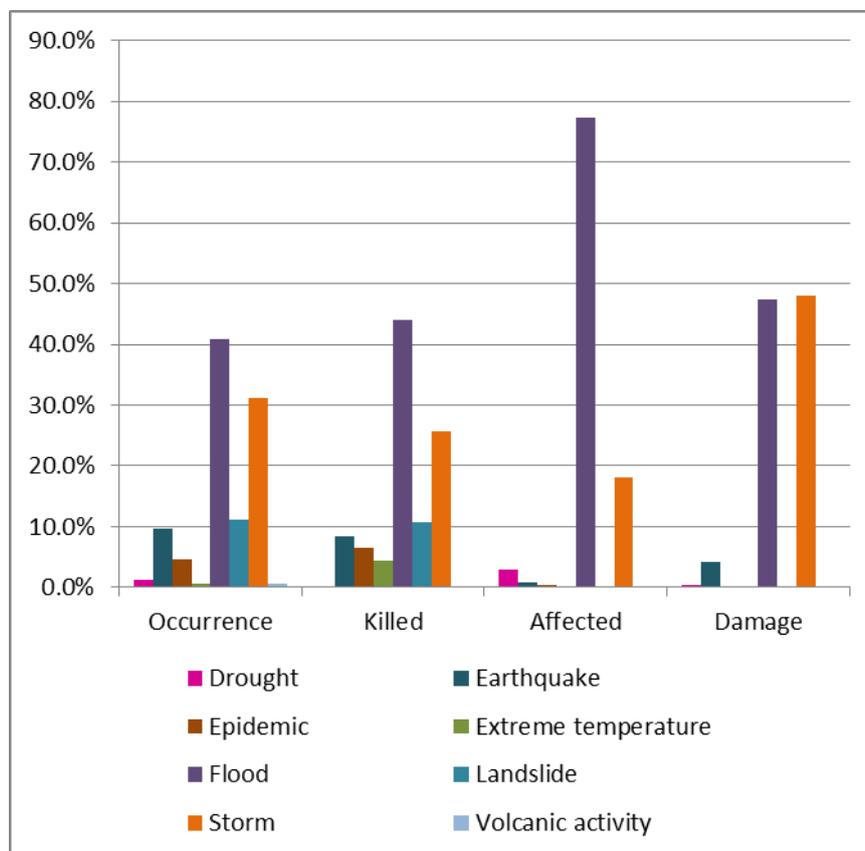

Figure 3: Impacts of Natural Disasters by Disaster Type in Asia, 2017

Table 3: Impacts of Natural Disasters by Disaster Type in Asia, 2017

Disaster Type	Impact			
	Occurrence (share in %)	Killed (share in %)	Affected (share in %)	Damage (US\$ million) (share in %)
Drought	2 (1.3%)		2,000,000 (3.0%)	122 (0.4%)
Earthquake	15 (9.7%)	511 (8.5%)	543,437 (0.8%)	1,295 (4.1%)
Epidemic	7 (4.5%)	395 (6.6%)	285,868 (0.4%)	
Extreme temperature	1 (0.6%)	264 (4.4%)

4. TRENDS OF WORLD NATURAL DISASTERS, 1988-2017

4-1 NUMBER OF DISASTERS IN THE WORLD (1988-2017)

In terms of number of disasters, the year 2017 sees a decrease from the previous year. In the long run, the upward trend continues from the late 1980s till 2000 and the downward trend follows. In the collective 5-year period representation of data in Figure 4-2, a downward trend is observed in the last 15 years starting from 2003-2007 period.

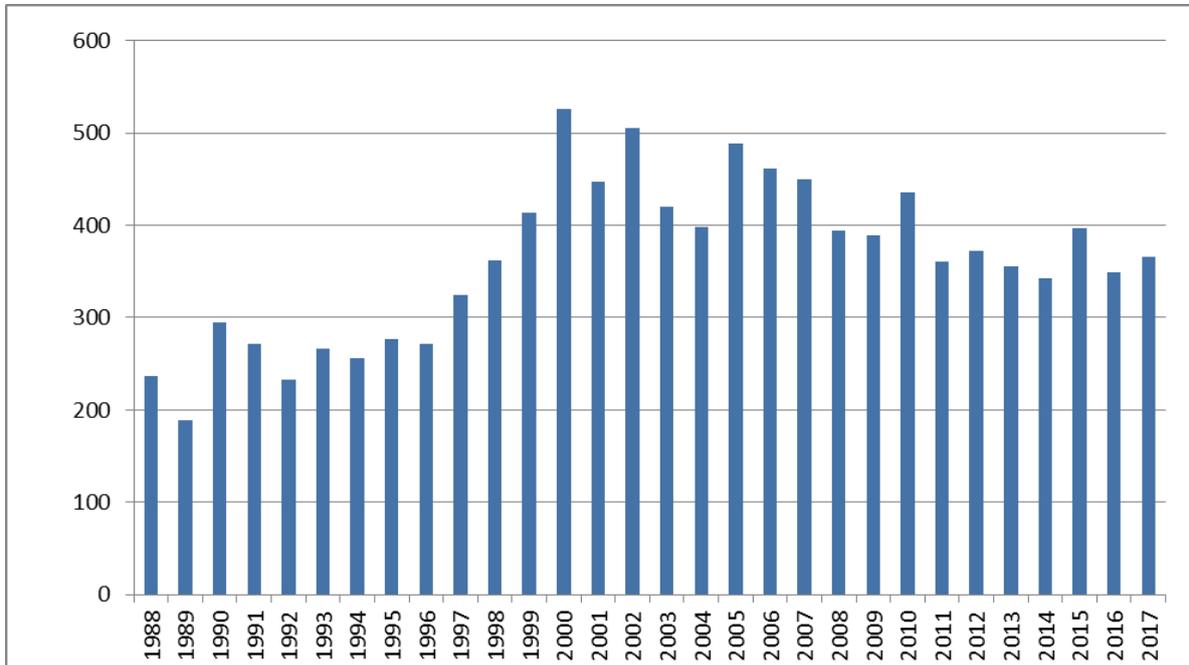

Figure 4-1: Disaster Occurrence, 1988-2017

Source:
EM-DAT: The OFDA/CRED International Disaster Database – www.emdat.be,
Université Catholique de Louvain, Brussels (Belgium)

4-2 NUMBER OF PEOPLE KILLED IN THE WORLD 1988-2017

The year 2017 shows a decrease of death toll from the previous year. As seen in Figure 4-4 about the trend of the 5-year period average, the number of people killed for the period 2013-2017 shows drastic decrease from 126,787 to 17,858.

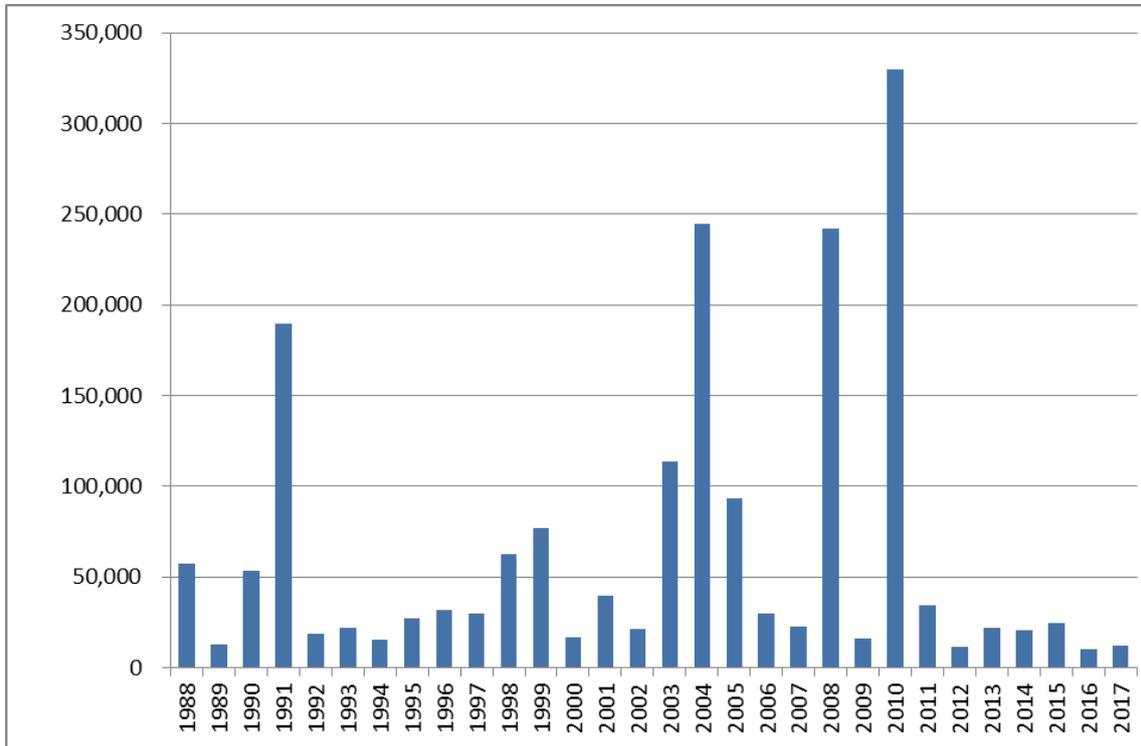

Figure 4-3: Number of People Killed, 1988-2017

Source:
EM-DAT: The OFDA/CRED International Disaster Database – www.emdat.be,
Université Catholique de Louvain, Brussels (Belgium)

4-3 NUMBER OF PEOPLE AFFECTED IN THE WORLD (1988-2017)

In terms of number of affected people, 2017 sees lowest in the past 20 years. For the 5 year period average representation of data, the number of affected people in the last five-year slightly increases with nearly 200 million people affected.

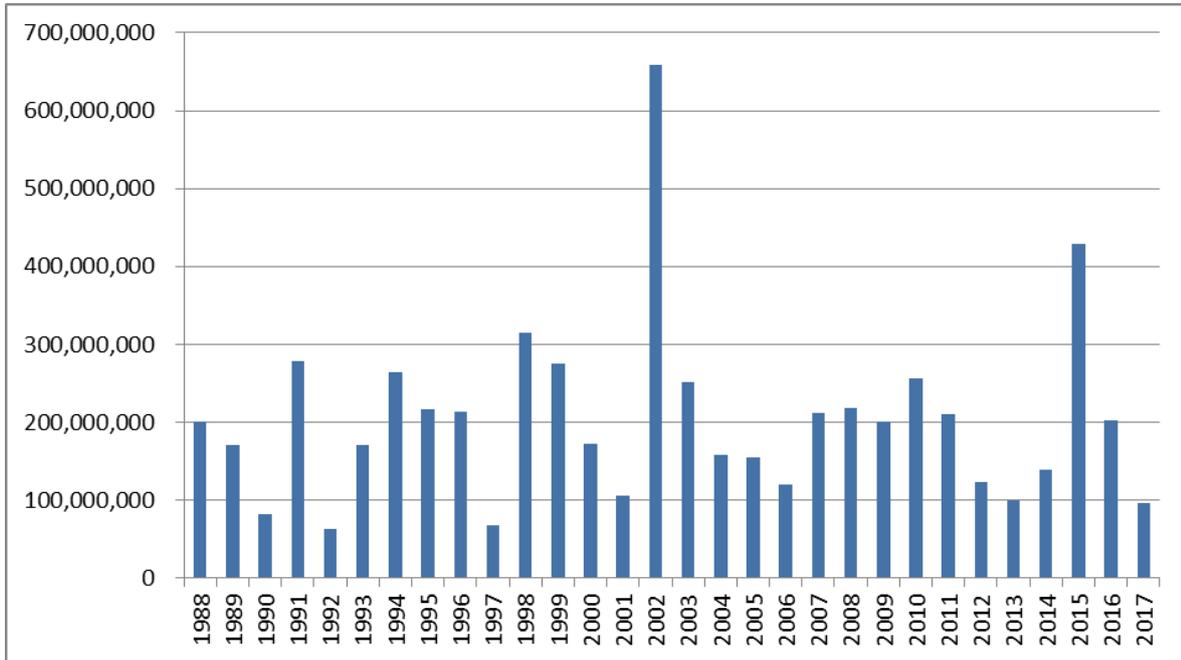

Figure 4-5: Total Number of Affected People, 1988-2017

EM-DAT: The OFDA/CRED International Disaster Database – www.emdat.be,
Université catholique de Louvain, Brussels (Belgium)

4-4 ECONOMIC DAMAGE IN THE WORLD (1988-2017)

Economic damage caused by natural disasters, the year 2017 sees an increase from the year 2016. By contrast, in the 5-year period average analysis, the 2013-2017 average sees a decrease.

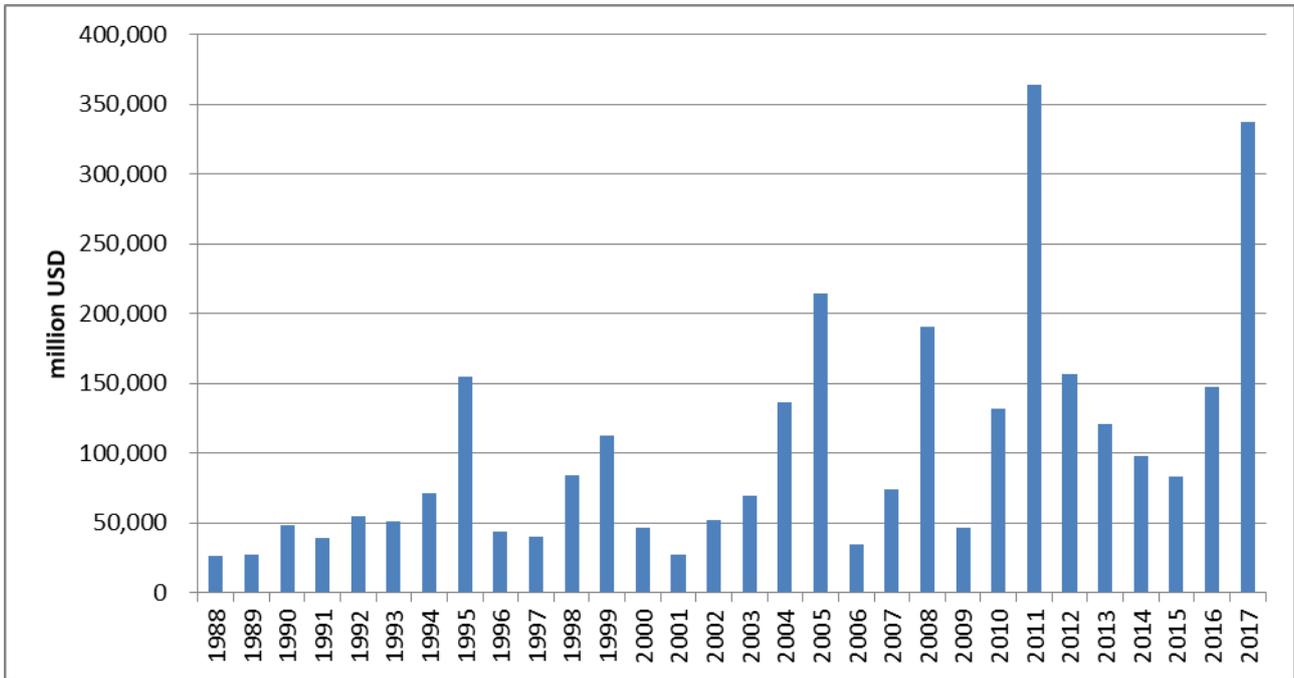

Figure 4-7: Amount of Damage (million USD), 1988-2017

5. IMPACTS OF WORLD NATURAL DISASTERS BY REGION, 1987-2016

For the period 1988-2017, Asia dominates and ranks the first in all natural disasters' impact categories across regions of the world, especially in terms of the number of killed and affected.

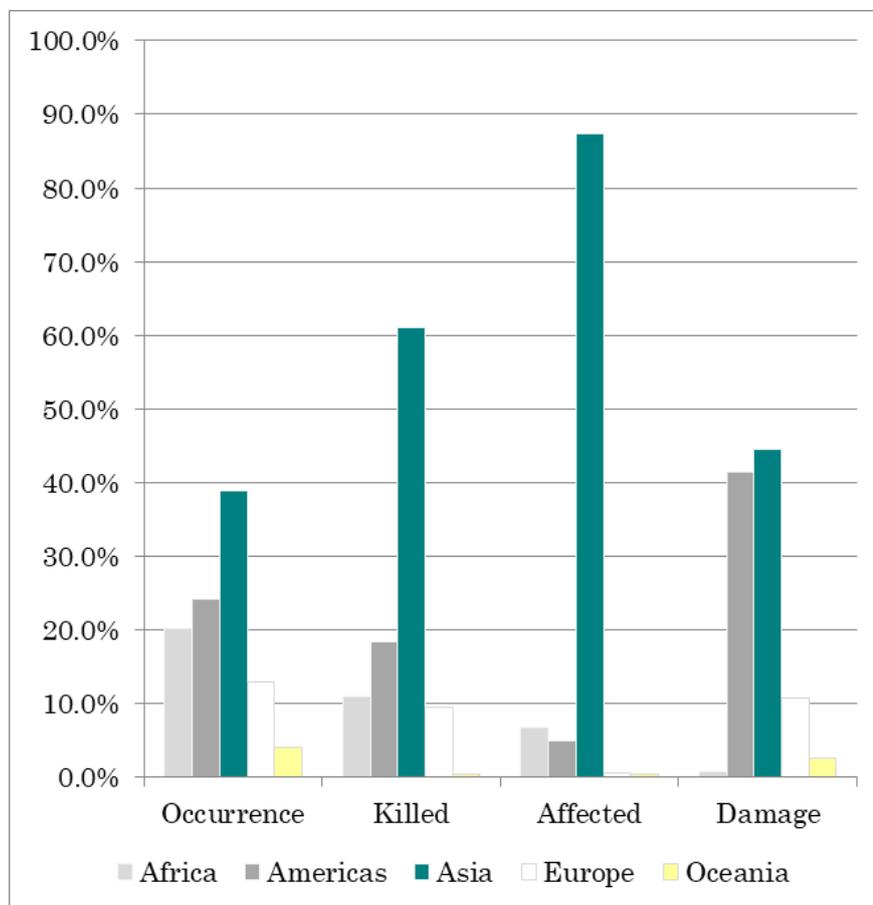

Figure 5: Impacts of World Natural Disasters by Region, 1988-2017

Table 5: Impacts of Natural Disasters by Region, 1988-2017

Region	Impact							
	Occurrence (share in %)		Killed (share in %)		Affected (share in %)		Damage (US\$ million) (share in %)	
Africa	2188	(20.2%)	206770	(10.9%)	415145309	(6.8%)	24,304	(0.8%)
Americas	2615	(24.1%)	349536	(18.4%)	303471222	(5.0%)	1,272,869	(41.4%)
Asia	4218	(38.8%)	1162223	(61.1%)	5347804067	(87.3%)	1,369,500	(44.5%)

6. THE 25 WORST DISASTERS IN ASIA 2017

6-1 THE 25 WORST DISASTERS IN ASIA BY NUMBER OF PEOPLE KILLED, 2017

The death toll by the storm in India in December tops at 884 in Asia in 2017, followed by the flood in India at 514. There are 13 disaster events in Asia found in the list which claimed more than 100 lives. Flood occupies thirteen ranks in the worst 25 list.

Table 6-1: The 25 Worst Disasters in Asia by Number of People Killed, 2017

Disaster Type	Country	Date	Killed	Affected	Economic Damage (US\$ Million)
1 Storm	India	02/12/2017	884	60,000	
2 Flood	India	31/08/2017	514	17,200,000	1,567

6-2 THE 25 WORST DISASTERS IN ASIA BY NUMBER OF PEOPLE AFFECTED, 2017

In terms of the number of people affected, the flood in India ranks the first with 17.2 million people affected. In 2017, the number of disaster events that affected more than one million amounts to 13. By country, Philippines has five ranks in the list. By disaster type, flood amounts to 15 out of the 25 disasters followed by 7 storms.

Table 6-2: The 25 Worst Disasters in Asia by Total Number of People Affected, 2017

Disaster Type	Country	Date	Killed	Affected	Economic Damage (US\$ Million)
1 Flood	India	11/08/2017	514	17,200,000	1,567

6-3 THE 25 WORST DISASTERS IN ASIA BY ECONOMIC DAMAGE, 2017

According to the EM-DAT database, the flood in China tops in the 25 ranks of the worst economic damage in Asia in 2017 with US\$ 6.0 billion. By disaster type, flood and storm have the largest shares with 12 and 11, ranks respectively.

Table 6-3: The 25 Worst Disasters in Asia by Economic Damage, 2017

Disaster Type	Country	Date	Total deaths	Total affected	Economic Damage (US\$ Million)

The Asian Disaster Reduction Center was established in Kobe, Japan in 1998 with the mission to enhance disaster resilience of its member-countries, to build safe communities, and to create a society where sustainable development is possible. The Center works to build disaster resilient communities and to establish networks among countries through many programs including personnel exchanges in this field.
